

# Petronas Twin Towers Technical Visit

On 20<sup>th</sup> June 2024, IFE Malaysia held a technical visit to the Petronas Twin Towers in Kuala Lumpur. Standing at 452 metres high, the 88-storey skyscraper is one of the tallest building in the world. KLCC Urusharta Sdn Bhd (KLCCUH) who manages the much admired landmark, was our gracious host.

## A memorable and illuminating visit to Malaysia's pride

Led by KLCCUH's Safety & Crisis Management Head, Encik Amirul Hakim, IFEM members were firstly briefed on fire protection and emergency response systems of the twin towers and 50 acres adjoining urban park.

This was followed by a visit to the level where fire protection pumps and firefighting tanks were housed. A walk through the famous sky-bridge and feasting of Kuala Lumpur panoramic views on the 87<sup>th</sup> floor was icing on the cake for the visit.

As a token of appreciation, IFEM presented KLCCUH with the institution's newly minted plaque and KLCCUH presented IFEM with a shiny miniature model of the Petronas Twin Towers.
